WROUGHT-IRON SCRAP AND OLD ZINC, OR ZINC CUTTINGS, TAKEN IN EXCHANGE
FOR GOODS, OR BOUGHT FOR CASH.

GALVANIZED CORRUGATED IRON SHEETS.

REVISED PRICES,

(SUBJECT TO ALTERATION WITHOUT NOTICE,)

FEBRUARY, 1887.

GALVANIZED CORRUGATED SHEETS.

Length.	Corrugation.	Gauge.	Galvanized Iron, per Ton.	Weight per Sheet, 6 ft. long by 8/3 in. flutes wide, about
48 to 96 in.	× 5/5 in.	× 16 G.	11 15 0	40 lbs.
" "	× "	× 18	11 15 0	32 "
" "	× 8/3 or 5/5 in.	× 20	11 15 0	25 "
" "	× "	× 22	12 0 0	21 "
" "	× "	× 24	12 0 0	16 "
" "	× "	× 26	14 0 0	13 "
" 72 in.	× "	× 28	15 0 0	11½ "

Only 3-in. flutes kept in stock; 4 and 5-in. made to order.

EXTRAS.

Corrugated Sheets, 16 to 26 G., over 96 in. and up to 108 in. long	...	20/- per ton.
Curving Corrugated Sheets	...	10/- "
Punching " " on one side and end	...	10/- "

A Corrugated Sheet 6 ft. long by 8/3 in. flutes wide will cover a space 5 ft. 8 in. by 2 ft., after allowing for laps. Other lengths of sheet in same proportion—that is, 3 to 4 inches to be allowed from the length; no allowance is necessary in the width, as a sheet with 8/3 in. flutes will cover 2 ft.

Black and Painted Corrugated Sheets quoted for on application.

GALVANIZED IRON LIGHT CORRUGATED SHEETS.

72 in. long by 8/3 in. corrugations wide, per sheet	...	1/6 each.
84 " " " " " "	...	1/9 "
96 " " " " " "	...	2/- "

These Sheets will be found to be very cheap and useful for a variety of purposes, where price is the chief object.

Prices at the Works, Birmingham.

Prices at the Works, Birmingham.

PATENT CONTINUOUS ROOFING, OF GALVANIZED IRON.

The large and increasing demand for our PATENT CONTINUOUS ROOFING SHEETS has induced us to manufacture it in other sizes and gauges than those in which it has hitherto been made. Having just completed extensive additions to our plant and machinery, we are now making the Patent Continuous Roofing in the following sizes and gauges, viz. :

31 G × 24 inches wide	at 3 $\frac{3}{8}$ d. per foot super.
28 G × 24 or 30 inches wide	at 3 $\frac{1}{2}$ d. " "
26 G × 24, 30, or 36 inches wide	at 4d. " "
24 G × 24, 30, or 36 " "	at 4 $\frac{1}{2}$ d. " "

Nails for Fixing— $\frac{3}{4}$ inch, 1/6; 1 inch, 2/6 per 1000.

N.B.—A Punch with 5 teeth (which we supply if required, price 2/6) should be used to punch the holes for the nails. Great expedition is attained by using such a punch; and, by placing the last tooth of the punch in the last preceding hole, a complete gauge is obtained, and greater regularity is produced in the nailing than if a single-pointed punch were used.

Roof covered with Patent Continuous Roofing Sheets laid on Battens.

Roof covered with Patent Continuous Roofing Sheets fixed to the Rafters.

**Orders of the value of £2 and upwards delivered to any Railway Station in
the Kingdom.**

Special Quotations given for large quantities.

ROUND WROUGHT IRON RAILING CONTINUOUS FENCING, No. 21.

This Fencing, which has grown so much in favour with the public, can be adapted either for Sheep or Oxen, or for divisions in pleasure grounds, the parks of noblemen, &c., in all of which situations it has been extensively used and highly approved of. The superiority of this system of fencing consists chiefly in its great strength and durability, as compared with any other. It is, moreover, very simple in its construction, so much so, that any labourer could fix a considerable quantity in a day. If for exportation, it can be packed to occupy the space of common bar iron. It stands 3 feet 9 inches high above ground, and 14 inches below. The top bar is $\frac{3}{4}$ diameter, and the four under $1 \times \frac{1}{4}$. Standards $1\frac{1}{2} \times \frac{3}{8}$, every three feet. Joining standards $1\frac{3}{4} \times \frac{8}{8}$, every fifteen feet.

Price, 2s.4d. per yard.

CONTINUOUS ROUND AND FLAT BAR FENCING, No. 26.

This Fence is similar to No. 21, but made 4 feet high, with an additional $1 \times \frac{1}{4}$ flat bar. It is shown with a cast-iron fluted post, which is used at the terminus of the fencing, and can also be used where gates are required in the line of fencing, which would give it an improved appearance, besides staying the fencing and giving security for the working of the gates.

Price, 2s.7d. per yard. C. I. Terminal Pillars, 16s.

Prices at the Works, Birmingham.

No. 1.
WROUGHT IRON STRAINED WIRE FENCE.

This Fence stands 3 feet 9 inches high out of ground, with six wires, top No. 3, and five under No. 4. Either black or galvanized. The uprights are wood, to be supplied and fixed by the proprietor. The Straining Posts are Wrought Iron, and placed 200 yards apart, and battled to let into stone. The size of iron $1\frac{1}{2}$ inch square, and the Double Stay $1\frac{1}{2} \times \frac{1}{2}$. The wires strained by screws or rack.
